

PROJECT: PASSPORT TO THE WORLD

This quarter, our 5th-grade students became world explorers through their "Passport to the World" project, in which they researched countries to learn about their unique cultures. Using computers, students worked in teams to find facts about global maps, famous landmarks, holiday traditions, popular foods, nationalities, and flags. Through this project, the students didn't just learn about the world, but also practiced valuable skills like teamwork, gathering information, and confidently speaking in front of the class to share what they discovered.
