

A decorative border surrounds the central text, featuring various stylized leaves and patterns in vibrant colors like pink, teal, yellow, and orange. Some leaves have yellow spots or patterns, while others are solid or have small black dots. The background is a light, neutral tone.

# BARCELONA

*Sta. Agnès de Malanyanes Students*

# INTRODUCTION

## *Santa Agnès de Malanyanes*

Santa Agnès de Malanyanes is a very small residential village that belongs to La Roca del Vallès and is located in the province of Barcelona, Spain.

It has very few shops and businesses but is very close to Granollers and Barcelona.

# THE MONTSENY

The Montseny is a natural park and mountain range in the province of Barcelona. It is a protected area with many forests, rivers, and animals. The Montseny is an important place for nature and hiking.

Santa Agnès de Malanyanes is a small village near the Montseny. It is in the Vallès Oriental region, not far from the mountains. People in Santa Agnès can see the Montseny and visit it easily. The village and the Montseny share a similar natural environment with trees, animals, and fresh air.

# TRIP TO MONTSENY

Last school year, we went on a trip to the Montseny. We did a very interesting workshop about dinosaurs. We learned many things about them and had a great time in nature!

# BARCELONA; NOT ONLY FOOTBALL

Barcelona is a beautiful and important city. It has amazing buildings by Gaudí, like the Sagrada Família and Park Güell. The city also has wonderful beaches and a big port. Barcelona is a cosmopolitan place with people from all over the world, great food, and many cultural events.

# WATER

*What do you think about the water situation in Barcelona? Do we have enough water?*

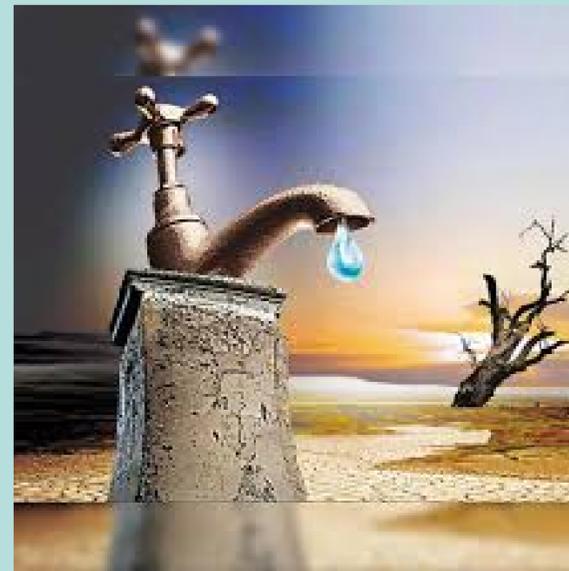

# WATER RESTRICTIONS

Last summer, Barcelona faced water restrictions due to a severe drought.

There was very little rain, and water reserves were low. The government limited water use for:

- gardens
- fountains
- cleaning streets.

People were also asked to save water at home. It was an important problem for the city and the whole region.

# THE PLAN

*What can we do?*

## STEP 1

Water saving at home

## STEP 2

Water saving at school

## STEP 3

Promoting awareness

THANK YOU
