

LIVING IN EUROPE

OUR NEW ERASMUS+ PROJECT

The project "Living in Europe" was gestated because we want a school opened to the principles and values of the European Union. Our aim is that our students know and respect the diversity of the cultures that form it. We believe that our European cultural project as ideal for our community.

Our school has been selected to carry out some innovation projects and it is considered as a plurilingual school. The pupils are highly motivated to work topics that are close to them and different and far off cultures, too. Our linguistic and cultural projects have contributed to create a leading school in our place. We opened our minds to other European cultures (customs, language, geography, traditions...) strengthening an attitude of internationalisation and tolerance.

We worked the European Union values like: respect for the human dignity, freedom, plurality, no discrimination, tolerance, justice, solidarity and equality between men and women.

We improved the students' English language level because we want our pupils to be prepared for their personal and professional future in a world without borders.

The students worked countries, cultures and European values with activities adapted to their age, some of them with the help of their families. The interdisciplinary projects and the decoration of the school is based in the European topics. In May we celebrated the "II Setmana de les Llengües". It was a great experience!
