

BE +

This year we worked on our new project Erasmus+, called «Be positive». We worked on human rights and a positive coexistence.

The project 'Be Positive' is the result of a mature reflection about our school strengths and weaknesses in the rules of coexistence that we actually apply to solving the problems that occur in our daily routine.

Our school has carried out innovative educational projects that make it a benchmark in our zone. All of them take into account the linguistic and cultural diversity as a base for school life.

We worked on the human rights that promote equality, no discrimination, freedom, etc. also worked on create positive attitudes in our pupils, actions to involve in the resolution of conflicts, worked on emotions a very important part of the human life and, last of all, but not the least, actions that help the centre to manage the necessary processes to work the coexistence.

We encouraged the collaborative work in the development of the coexistence rules, creating strategies to promote the participation of teachers, students and their families.

We contact with other European schools visiting them and using new technologies to cooperate with them or disseminate results.

Some of the activities that we did this year are:

- Work classroom rules and the basic coexistence values adapted to the age of the pupils.
- Debates and assemblies of students to improve communication skills.
- Activities about peace and no violence in the resolution of conflicts.
- Celebration of the «Be positive Week» to work respect, positive attitudes, emotions, sports and healthy lifestyle.
- Art crafts related related with positive things.
