CITY

My city is in Hospitalet de Llobregat. An urban space with a high population density. There are shops, industries, and various services.

As for the buildings of today. There are very modern buildings like in the Plaza Europa (parks, shopping centers, banks...).

CITY

In my city, everyone knows each other. From Monday to Friday, people go to work, study, do their things and the city is usually noisy, by the traffic and the pollution.

EDUCATION

In my institute (Santa Eulàlia), we are still using books, the backpacks that we carry are very heavy. But in other schools they use their own computers for their subjects and they don't need to carry many books.

EDUCATION

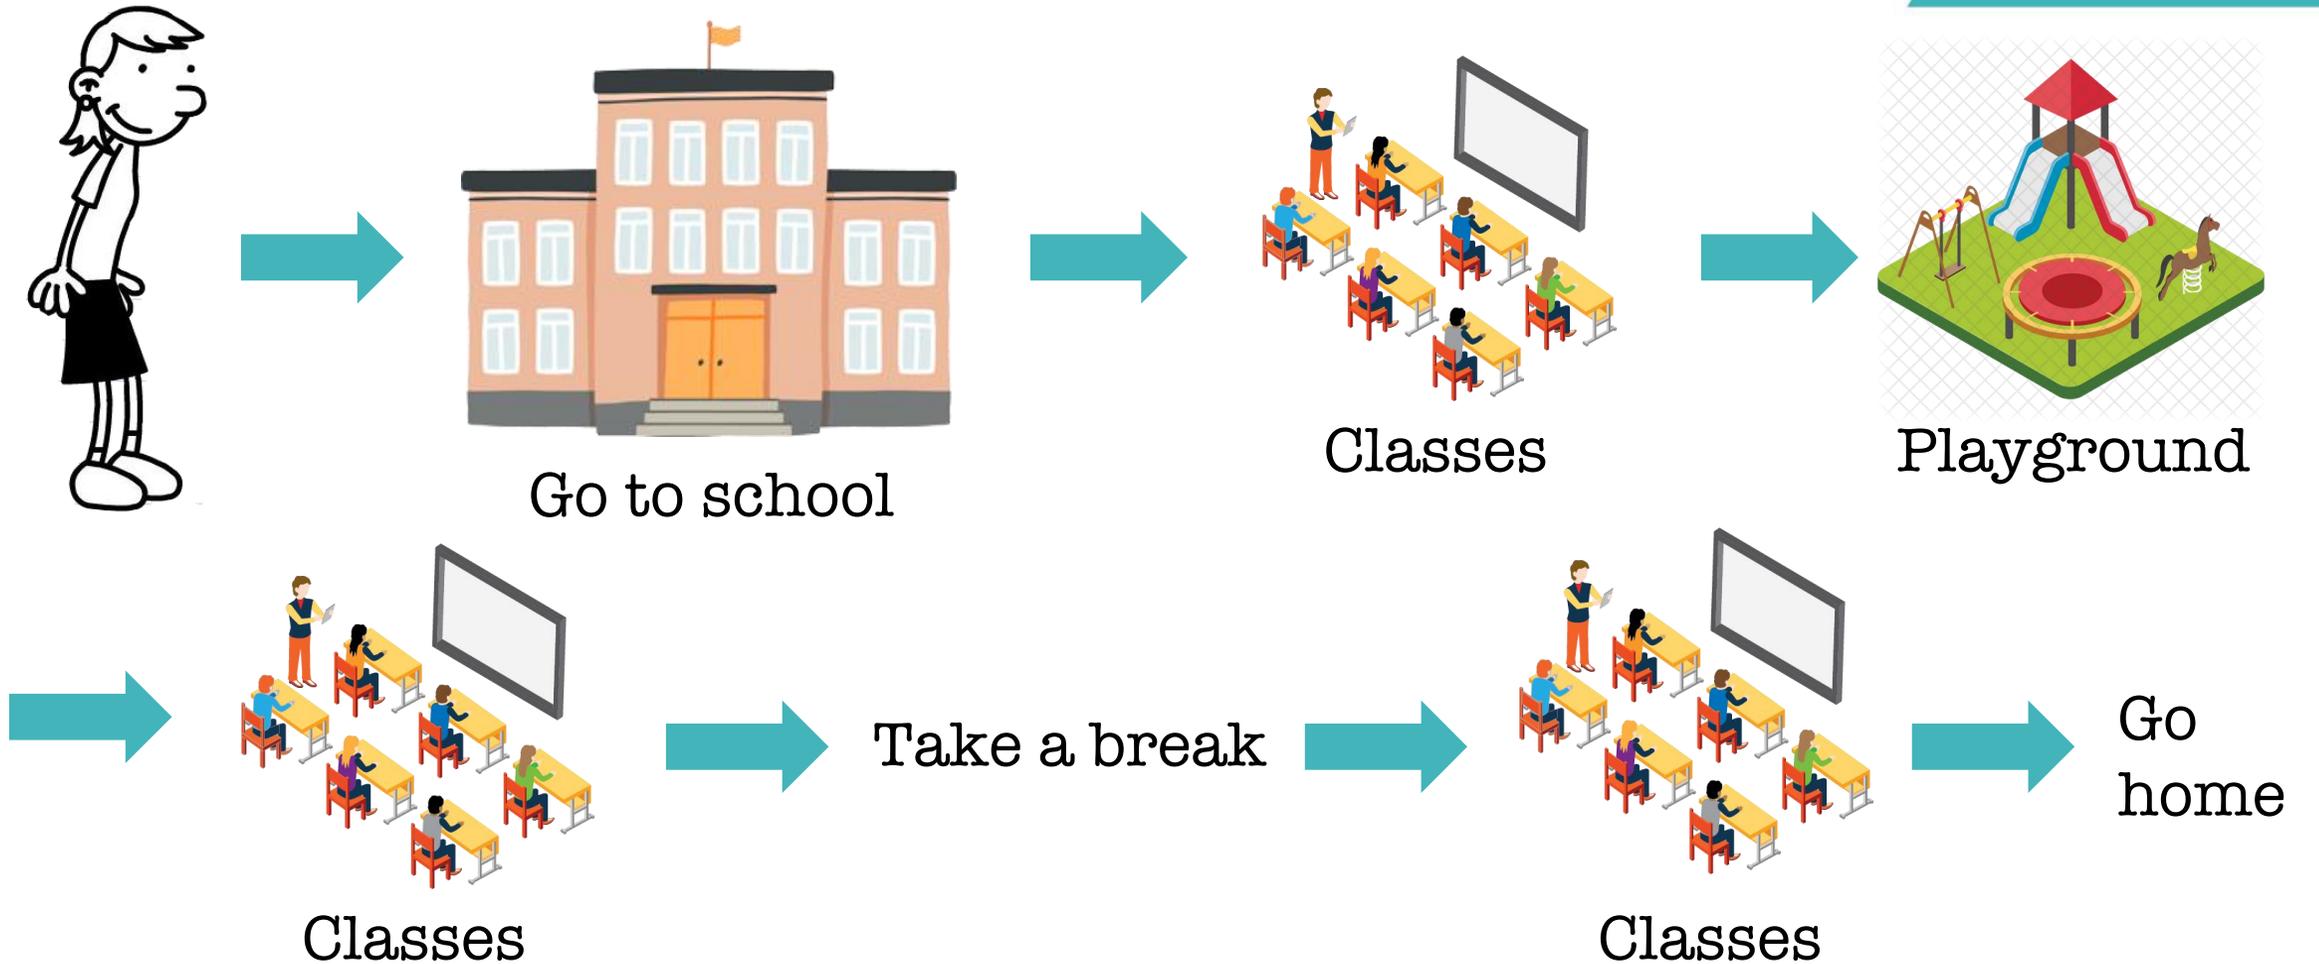

In ESO, we study basic (general) knowledge such as biology, physics, chemistry, mathematics, English, Spanish, Catalan, etc.

In the classes we use a normal blackboard (with chalk), but there are other classes that use digital whiteboards. And we also use projectors to watch videos, presentations, etc. (via computer)

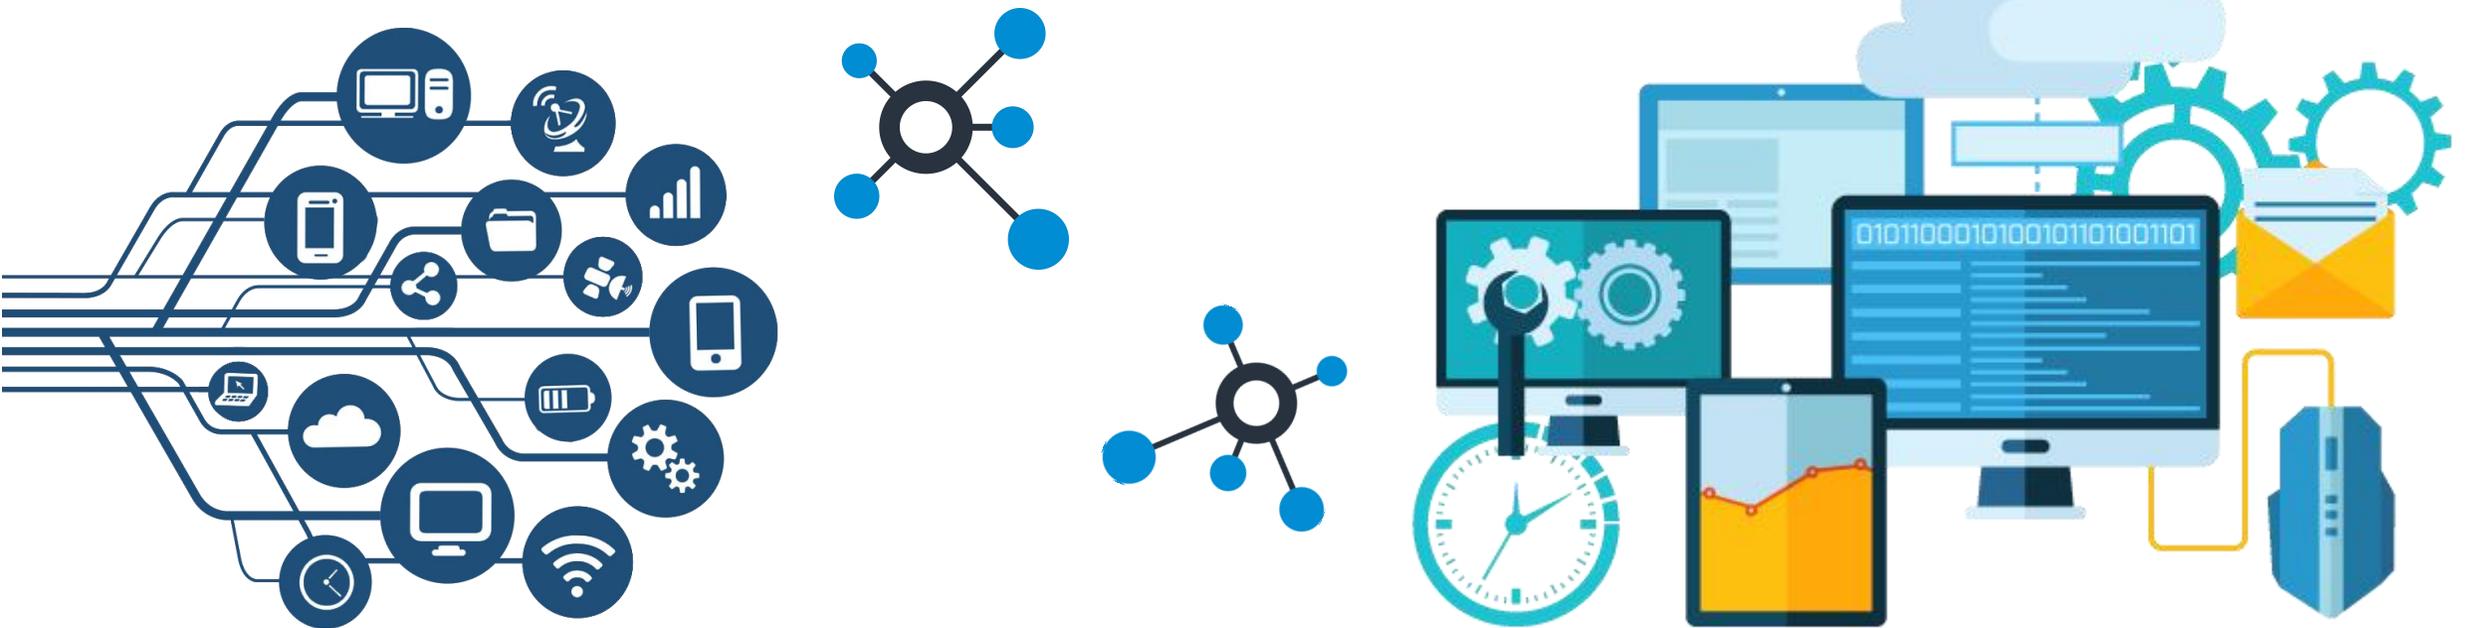

EDUCATION

This is my dairy routine. (at school)

TECHNOLOGY

Nowadays, the technology advanced a lot in the last 5 years. We already have the new 5G. And we also use WiFi, Artificial Intelligence (AI) such as the robots we have at home like the fridge, Alexa, TV's, mobiles, the computers, etc.

TECHNOLOGY

We use all these incredible tools for our subjects, especially the computer. Most of our homeworks are with notebooks and books, but we also have them with computers.

And for our daily routine, the tool that we use the most in our day to day is the mobile. At this epoch, it's very comfortable to wear, quick to use and easy to contact us.
(with applications!!)

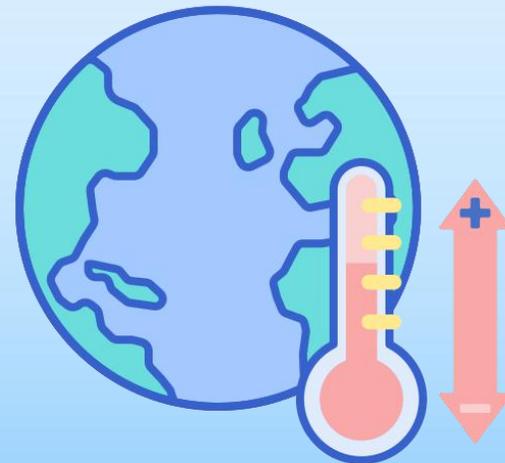

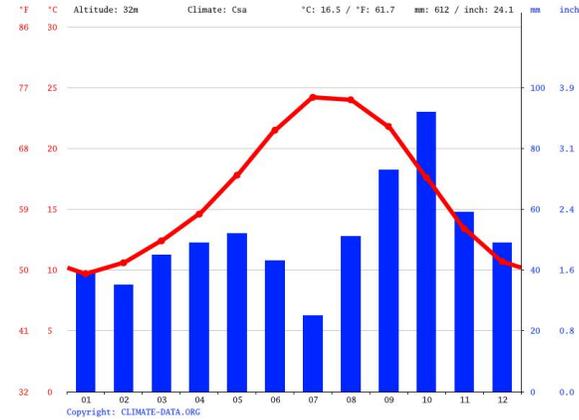

CLIMATE

In the past 5 years, the temperatures have risen.

It hasn't snowed in my city for years!!

Climate change is real and I hope you of the future take it seriously.

THANK
YOU
