MY PERSONALITY

What I can say about my personality is that I am generous because when someone needs something so I try to help them the best possible way. It depends on who I am with I am shy or so friendly. One thing that the people say to me is that I am bossy, and it is true, I like it and this is my defect. Also I am always laughing and when I don't happy it's because I am so angry. I try to listen to people more than I speak, it's good for me. In conclusion I'm sociable but not with all.

MY ROUTINES

Normally my day starts at 7:30h. When I get up I go to the bathroom to wash my hands and comb my hair. In my breakfast I drink a Colacao with toast and I try to eat at least one fruit. Then I get dressed and always I have prepared my clothes the previous day. When I'm done I kiss and hug my mum and my little sister and I go with my friends and neighbors to school. I start the class at 8:30 and I have lunch at 11:20h. I finish the class at 15:00h. I go home, my darling mother prepared for me and my sisters to eat. When I finish I have break time, this time I listen to music, I sing, dance or watch memes on my phone and I help my mum to tidy the house. If I don't have any homework I cook a biscuit or something like that. At 17:30h I do my homework and I finish at 18:30h. Then my family and I met in the living room to talk about our day. At 21:00h we have dinner and finally at 22:00h we go to bed.

MY MEMORIES

First of all, what I can say about my childhood and everyone's is that it can be the better or the worse stage of your life. In my case what I can say about mine is that it has been very good. I have never lacked anything but neither has I left over. I was born on 02/20/2005 in Madrid. An anecdote we have is the one my parents told me the day I was born. When I was born, how happy my dad was, he fainted and it was something that marked us a lot. The first thing I can remember is that I had a silk pillow that I never wanted to put down. I really liked his touch. Another thing that I can say is that in my house we had pets, some chicks and some fishes that entertained me a lot.

MY MEMORIES

One of the days that I enjoyed the most was when some neighbors and I went to the pool. That day we had a great time. My childhood was also very marked by my mother. Since she was the one who was always by my side, she supported me, advised me ... I can define my childhood in three words: happy, exciting and fast. I have always been described and I have been a nervous girl, very talkative, but nevertheless a very good girl. Another of the memories that I have are the days we all played in the courtyard of my school at 123 little cheese stop with my classmates and my best friend at that time, Layla. My friends in my school Marià Fortuny called me Sami. In my school my favorite subject was English and Physical Education. I really liked going to school to meet my friends. What I liked was the weekend. Because I wanted to go back to school. My friends and I were enchanted with a singer named Violetta that we met on TV.

MY MEMORIES

What I also have to highlight are my parents, since they were my best parents and friends throughout our lives. They are very good and honest people. The trips that we made in Morocco when we go to visit my grandmother are very much appreciated. She has always done me everything I wanted as long as I was happy. My parents always tell me that I was an interested girl. When my mom prepared the food, she was calling me to eat. When I was going to the table first I asked if there was meat or only vegetables. If there were only vegetables this day I didn't eat. This is a very funny thing.

I live in a tiny apartment, where my room is small and where I don't like to spend much time. I prefer to be with my family in the living room.

Finally, what I can say about my childhood is that thank God I had a normal and good childhood with my family and friends. A childhood in which I spend good and bad moments, but mostly good and basic.

MY FUTURE

My future will depend on the efforts of my present, that's why I will do my best to be what I want, do what I want and travel wherever I want because I don't want to depend on anyone . Next year I will finally go to baccalaureate to specify the subjects that I like the most. I hope to finish my baccalaureate with a good grade so that later I can choose a career in business administration or something like that. After studying this hhhh I want to be a great entrepreneur and if it is going very well for me I will create my own company. I still don't know very well what my company is going to be but I have time to think. The second thing is that I want to travel a lot, I would like to go to Turkey, and one of the reasons is its gastronomy. To Russia too and many countries more. I would like to have a personalized home for me, to be comfortable with my own home. I hope I can give back to my parents all the efforts that they give every day for me because they deserve much more than they think. Helping people who need it is something that I am going to do a lot in the future, because helping is very important for me. Finally I want to emphasize that things may change and I do too, but being a great businesswoman is my biggest dream and about getting married will only happen if there is someone who really deserves it and if there is not, I will not get married. I can live perfectly without a man.
