

Discover the Torrent dels Alous pond!!!

Maria, Albert, Samuel, Joel, Yura and Juan

Part of the surroundings of this waterway is in the municipality of Rubí, while most of it belongs to Sant Cugat del Vallès, it occupies an area of about 10 hectares, which is bounded by the AP-7 highway, the Generalitat railway line, the Rubí RENFE station, and the Ca n'Alzamora park.

How was it originated

The origin of the pond is artificial, since it was formed by the installation in this place of a clay pit during the 60s that caused the emergence of a vein of underground water that continuously feeds the pond.

since when and how is it used?

they have been fighting to preserve this area, one of the most important non-fluvial wetlands in our city. There are birds, frogs, snakes and a lot of vegetation.

Solution:

The pond of the Torrent of the Alous is being used since 2001 until now. People go there to fish, relax and walk, It's a nice place to go with the family and rest.

Improve city water quality

There are many products that are poured into the sink that are difficult to remove or harmful: paint, oil, cleaning products, solvents, etc. One liter of mineral oil can contaminate 10,000 liters of water. You have to separate them and take them to the garbage or to the Green Points.
