

# OUR SCHOOL WATER GUIDE

*INSTITUT LES MARGUES*  
*2N ESO*

# *WATER GUIDE*

**Our school uses a lot of water, there are many toilets, many sinks, fountains, etc**

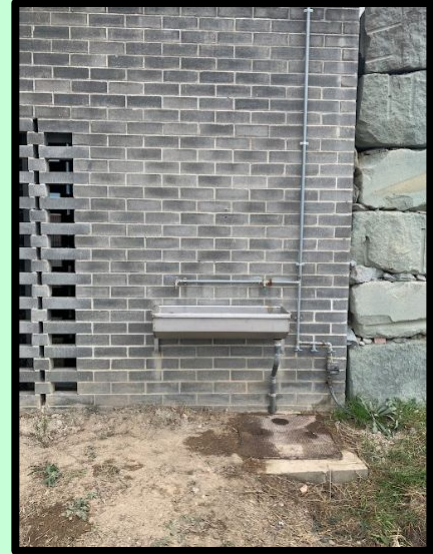

# Vegetable garden

## **Our observations:**

It is a faucet that is only used for the vegetable garden.

## **New ideas:**

Some new ideas are that there is an optional class where the students work in the vegetable garden.

## TOILETS 2ND FLOOR

**Our observations:** There are so many toilets in our school, one of these is on the 2nd floor.

In a toilet on the second floor there are 3 toilets and 3 faucets. There isn't anything broken, but a tap was dripping, and the toilets are clean too.

**New ideas:** One proposal is that they can put mirrors, and they have to put automatic water.

# LABORATORY OF BIOLOGY

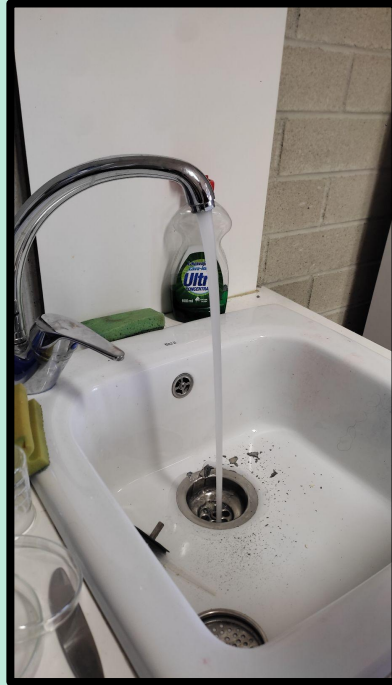

**Our observations:** There are two faucets, none is dripping, the faucets don't close automatically and the students and teachers in the laboratory have access. They are used for cleaning laboratory material.

**New ideas:** We think that one thing we would like to change would be that there was so much laboratory material out there, in the marble. And it should be orderly.

# LABORATORY OF BIOLOGY

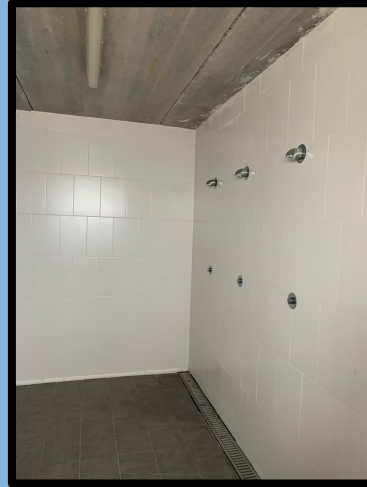

There is a photo:

# Toilets Gym

## Our observations

There are two toilets on the gym at our school. There are not separate genres. Everyone can go, but some teacher has to have let them go.

## Questions or new ideas

There are many students that at playground time they have to go to the toilet and before P.E they also have to shower because they sweat. The school put have hot water and we can have a shower.

# Toilets 1st floor

## OUR OBSERVATIONS

There are many toilets in our high school.

The toilets on the 1st floor have two sinks and three toilets. Only students of 1st and 4t use it. They are quite clean.

# Toilets 1st floor

## NEW IDEAS

We didn't find anything broken, but one idea is that we can put mirrors. We have to change the automatic water because it last over so much time open.

# TOILETS ON THE GROUND FLOOR

The toilets on the ground floor

Can be only used by first-year students.

The toilets are for boys and girls.

Each course has toilets and you can only go

to those in your course

and sometimes they are on different floors.

Does your school have mixed toilets?

# TOILETS ON THE GROUND FLOOR

## OUR OBSERVATIONS:

The toilets on the ground floor can be only be used by first-year students.

The toilets are for boys and girls.

# Playground Fountain

Our observation:

Questions or new ideas

We have a fountain upstairs on the right from the playground. All the people can drink in this fountain.

The fountain is okay, but it, it takes a long time for the water to stop coming running, and it will, can be an automatic to recycle more water.

**THIS IS THE FOTO:**

# TEACHER ROOM

## OUR OBSERVATION IS:

Nothing is missing and there is nothing badly done or dirty.  
The teacher's room has a machine coffee and have 1 singers.

## Questions or New Ideas:

Is not automatic.  
It is put to good use and everything works well.  
You have a machine coffee?

# Teacher's Bath Room

## OUR OBSERVATIONS

There is a tap and a sink to wash the hand.

In general, we think we use the water efficiently.

## OUR IDEAS

We think we can change automatic water faucets for another one's shorter period of time falling water.

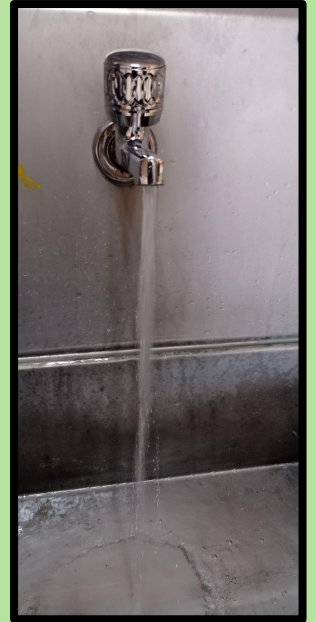

# ART CLASS

## **Your observations:**

The water is very hot and when you twist a little, a lot of water comes out.  
It's of iron.

## **Questions or new ideas:**

The water is colder and less water comes out.  
They think to change the faucet?

# Physics and chemistry class

## *Our observations:*

**Faucets not dripping,  
and they were clean. We  
use these faucets a lot in  
science. The faucets d'ont  
authomatic.**

# Physics and chemistry class

Questions or new ideas:

we thought it wouldn't be bad to put the pipes a little more hidden because it looks bad aesthetically  
The faucets looked old

# Classroom of Technology

## *OUR OBSERVATIONS*

Enough water causes our to wash  
classroom materials and hands.

## *NEW IDEAS*

The automatic water sinks should have  
last duration.

## Conclusions:

In general, we think everything is fine, except that we can change the automatic water faucets to ones with a shorter period of time that the water falls.
