

A spiral-bound notebook with a white cover and lined pages is set against a blue background with green speckles. The notebook is decorated with several items: a yellow sticky note with a blue spiral edge is tucked under the top left; a large orange bookmark is placed vertically on the left side; a pink sticky note is attached to the bottom left; and a pink rectangular sticker is on the bottom right. The text 'Institut Les Margues' is written in pink at the top, and 'COMMUNITY ACTION PROJECT' is written in large orange letters in the center, flanked by pink dashes.

Institut Les Margues

— COMMUNITY —
ACTION PROJECT

OUR GOAL

We did this project to make people aware that there is a lot of garbage in many water sources that pollute and harm animals.

Our goal for this project was to clean different polluted places because there is plastic and pollution in lots of places, and we wanted to change it. We cleaned Les Set fonts in Sant Julià de Vilatorta. It is about changing a polluted space to a clean one. We threw the bag with the trash in a container to then recycle it.

CLEAN-UP DAY

We are a group of students, we went to the Set fonts to clean the water in the fountain and the park next door. We took garbage bags, put on gloves and cleaned it up together. Furthermore, we went 4 people. It took us 30 minutes because the environment was not very dirty. Our goal was to keep the fountain and its surroundings clean so that the people who go there can enjoy nature. And also that the insects don't eat plastics.

We enjoyed so much the clean-up, and we are going to repeat it!

CLEANING A RIVER

In our group we went to clean a river in our village which was very dirty. We have chosen this place because we are very sorry that places as beautiful are in these situations. We would like that through this slide we can make more people aware of the situation and do the same as us.

Clean Up

We have cleaned up the “Font del Peix” a public fountain that is in our town, Sant Julià de Vilatorça

- Our goal was to clean the fountain and throw the rubbish in the rubbish bin.
- First we caught a plastic bag, and we started cleaning, meanwhile I asked my friends to take photos when I was cleaning.

CALLDETENES (SANT MARC)

With our group of friends, we went to clean up our town. We went in different places of Calldetenes and we cleaned it.

Luckily, there wasn't much trash. In total, we removed 2 rubbish bags and we threw it in the town containers.

CLEANING A LAKE

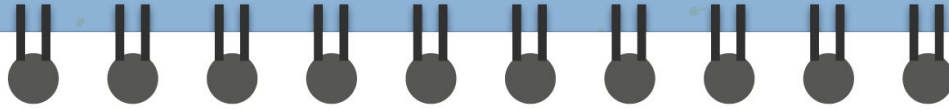

We are a group of friends. We went to a lake in Viladrau, we collected all the trash from the lake and threw it in the rubbish bin.
