# SUSTAINABILITY

**ELECTRICITY CONSUMPTION BY 20%  
LED LIGHT instead of LIGHT BULBS**

**TO MAKE THE LONDON EYE MORE ECO-FRIENDLY WE  
SUGGEST USING SOLAR PANELS TO MOVE IT WHEN  
IT IS SUNNY.**

# INTERESTING FACTS

1. The London Eye is not a ferris wheel is a cantilevered observation wheel.

2. During 6 years was the biggest ferris wheel of the world.

3. The booths are numbered from 1 to 33, omitting number 13 for superstitious reason.

4. At the top of the London Eye, you can see 40 kilometres away.

5. Each of the 32 capsules holds up to 25 people, allowin 800 people at a time.

6. It was 7 years old to build.

# PERSONAL CONNECTION

**We feel good and interested doing this learning box because we really like the Great Britain landmarks.**
